Full Stack Developer - ReactJS, NextJS, ElectronJS, React Native, Expo, OpenAI, LLM, PHP, MySQL, NodeJS, ExpressJS, MongoDB, Google Cloud, AWS

Pakistan

Summary

One of my biggest achievements was progressing from a mid-level developer to a Senior Full Stack Developer and team lead at Dipixels, earning two promotions based on performance and ownership. I am also proud of delivering production grade SaaS platforms across web, mobile, and desktop, including the ATR Smart Procedures system used in industrial environments and a real-time fleet tracking platform handling live data at scale.
Additionally, building and integrating complex applications such as a cross-platform travel booking app with third-party APIs strengthened my ability to deliver reliable, user-focused solutions in high impact, real-world settings.

Experience

DAVISOFT, INC.
Full Stack Developer
May 2024 - Present (1 year 9 months)
Remote

Company Description
• I served as a full-stack developer for over 16 months on ATR Technologies'
PRiSM
Performance Suite, a comprehensive software platform designed for performance
monitoring and operational management in industries such as energy, utilities, and
manufacturing.

• Built and maintained a web interface using React.js, a mobile application with React

Native and Expo, and cross-platform desktop apps using Electron.js, ensuring a seamless

user experience across all platforms.

• Developed robust backend APIs and services using Node.js, enabling scalable data

processing and reliable system performance.

• Collaborated with globally distributed teams in a remote environment, leveraging Slack

and JIRA to coordinate sprints, manage tasks, and communicate efficiently across time

zones.

• Played a key role in delivering production-ready features for performance analytics, fixing

bugs reported by testers, and system health monitoring.

One Technology Services, USA
Senior Frontend Developer
January 2024 - June 2024 (6 months)

Company Description

• Developed a real-time Fleet Tracking Web Application using React.js with TypeScript and

Redux Toolkit, integrating Google Cloud Platform to enable live vehicle tracking and

dynamic data visualization.

• Collaborated with cross-functional teams via Slack, Microsoft Teams, and JIRA,

contributing actively in feature planning and sprint discussions as a core member

throughout the product lifecycle.

• Engineered frontend components to display driver performance analytics, vehicle fuel

stats, and maintenance schedules, enhancing operational visibility for fleet managers.

• Seamlessly integrated frontend with a Python-based backend and AWS-hosted database,

enabling real-time data syncing and improving system responsiveness and reliability.

• Utilized Tailwind CSS for responsive UI design, delivering a user-friendly and intuitive
interface tailored for both desktop and mobile users

Dipixels
3 years

Senior Full Stack Engineer
October 2022 - January 2024 (1 year 4 months)
Karāchi, Sindh, Pakistan

Company Description
• Got hired as a mid-level software developer and received two promotions over three
years to become team lead of full stack developers.
• Experienced in building mobile applications using React Native and Expo.
• Skills in web applications development with ReactJS, Next.js, and Gatsby.
• To develop backend solutions utilizing NodeJS, Express.js, MongoDB, and Firebase.
• To deploy applications on various cloud platforms, including AWS, Google Cloud,
Heroku, and Vercel.

Full Stack Developer
February 2021 - January 2023 (2 years)
Gulshan Town, Sindh, Pakistan

PropTexx (Techstars LA'23/REACH CA'24)
Senior React Native Developer
February 2023 - December 2023 (11 months)

Company Description
• Played a key role in building the Orbzii mobile app using React Native, ensuring
smooth functionality across both iOS and Android platforms.
• Worked on integrating third-party APIs like Expedia and Amadeus for real-time
flight and hotel search and booking.
• Helped design and implement an intuitive, swipe-style user interface inspired by
Instagram/Tinder for destination discovery.
• Assisted in building secur

UBBASOFT
Frontend Web Developer Internship
April 2018 - June 2018 (3 months)
Pakistan

Company Description

• In this 3-month internship program, I developed a dashboard using PHP programming.

• To develop the app's frontend.

• To connect MySQL database tables with the dashboard tables.
